2019 was a great year with 2020 forecasted to exceed 2019. The uncertainty in the Middle East could impact raw material pricing but current U.S. energy policy should temper the movement to avoid significant swings. We are seeing a move towards contract manufacturers and reduction of marketer filled products. –U.S. Midwest

In 2019, the economy in Brazil was not so good, so the population, in general, avoided spending money. We [saw] an increase of companies that started to sell aerosol products, causing a demand for contract fillers. We are seeing the filling market following a trend in utilizing services, because the number of brands is growing and the factories are bigger and [more] specialized. Moreover, the cost [for marketers] to build a factory [for] aerosol filling is not so cheap. –Brazil

2019 was a great year; we saw substantial growth in certain industries we manufacture for. [The year] 2020 looks to be a great year; we have many new customers that once purchased internationally that have now returned all filling here to the US. We have not experienced any marketers filling in-house. –U.S. Southeast

Fillers are becoming key to all aspects of the industry for marketers with and without their own facilities to help speed-to-market and flexible opportunities. –UK

Some marketers that are changing ownership are now outsourcing their filling needs. –U.S. Midwest

2019 was a year of continued growth for [our] business, which was driven by investment in manufacturing capabilities and capacity. Trends include the continued movement toward outsourcing, demand for travel and trial-size products to meet an increasingly mobile consumer base and new products, e.g. CBD-infused and aromatherapy products. Outsourcing continues as more personal care, household and OTC companies are choosing the option to use contract fillers instead of handling those functions in-house. Contract fillers allow these companies to focus on selling their products, rather than on manufacturing. –U.S. Northeast

2019 was not so good from [a] business point of view. However, we hope 2020 will be better. –India

2019 was a strong growth year. We expect more of the same due to a larger need for fulfillment for new products coming to market. We are seeing a trend of businesses sticking to their core competencies and outsourcing their filling to contract fillers. –U.S. Northeast

[Our] plant has been put into operation and hopes to serve world-renowned aerosol brands. –China

2019 was a phenomenal [one for us] and 2020 is looking to be another amazing year with growth fueled by increased sales of existing SKUs, the addition of new marketing partners and the introduction of both incremental and new-to-the-world product innovations. The tight job market continues to be a challenge. The trend of outsourcing turnkey contract innovation, development and production of consumer health care aerosols continues to grow and build momentum. –U.S. Southeast
